

Exercise 1 – Configuring Accepted Domains

Objective: Configure the **accepted domains**.

Tasks:

1. Using Exchange Admin Center:
 - a) Check the names of existing **accepted domains**.
 - b) Create a new authoritative accepted domain **ITMT** for the domain **itmt.local**
2. Using PowerShell Exchange Management Shell:
 - a) Add to your domain an additional **UPN suffix domainXX.ca**
 - b) List the existing **accepted domains** in your Exchange organization.
 - c) Create a new accepted domain type **internal relay** named: **domainXX.ca**
 - d) List the accepted domains of the Exchange organization to verify that the new domain has been created.
 - e) Add a new User “**Justin Trudeau**” with a mailbox using the new **UPN suffix domainXX.ca**
 - f) Create a new accepted domain type **external relay** named: **domainXX.com**.
 - g) List the **accepted domains** of the Exchange organization to verify that the new domain has been created.
 - h) Remove the accepted domain **itmt.ca**.
3. Using Exchange Admin Center:
 - a) Check the names of the existing accepted domains, to confirm that all the accepted domains created in the previous steps exist.

Exercise 2 – Configuring Email Address Policies

Objective:

- Configure the email address policies.

Tasks:

1. Using Exchange Admin Center:
 - a) Check the names of existing email address policies.
 - b) Create a new **email address policy** with the following settings:
 - Name: **DomainXX Canada**
 - Accepted domain: **domainXX.ca**
 - Email address format: **lastname_firstname@domainXX.ca**
 - Priority: **1**

- c) Apply this new policy to **Users with Exchange mailboxes**.
- d) Preview recipients the policy applies to.
- e) Apply the new email address policy.

2. Using PowerShell Exchange Management Shell:

- a) List the names of existing **email address policies** in your Exchange organization.
- f) **Delete** the new policy **DomainXX Canada** and confirm.
- g) Create a new **mail address policy** with the following settings:
 - Name: **Domain_Public**
 - Accepted domain: **domainXX.ca**
 - Email address format: **firstname_lastname@domainXX.ca**
 - Priority: **1**
 - Apply this new policy to: **MailboxUsers**
 - Apply the new email address policy.
- b) List the **all the email address policies** of the Exchange organization to verify that the new policy has been created.

3. Using the Exchange Admin Center:

- a) Check the email address policies to view the **new email address policy** created in the previous steps.
- b) Open the new email address policy and **Preview recipients the policy applies to**.
- c) Verify that the new email address policy has been applied by verifying in the user **mailboxes** their **Email address format**.

mailboxes groups resources contacts shared migration		
DISPLAY NAME	MAILBOX TYPE	EMAIL ADDRESS
Administrator	User	_2@domain25.ca
Ahmed Ali	User	Ahmed_Ali@domain25.ca
Antoine Tohme	User	Antoine_Tohme@domain25.ca
Elon Musk	User	Elon_Musk@domain25.ca

Lab Deliverables

You should submit a **lab report** including the **screenshots** of the **GUI configuration**, **PowerShell commands** used and its **results**.
