# Configure MAPI/HTTP

To configure **MAPI over HTTP**, follow these steps:

_____
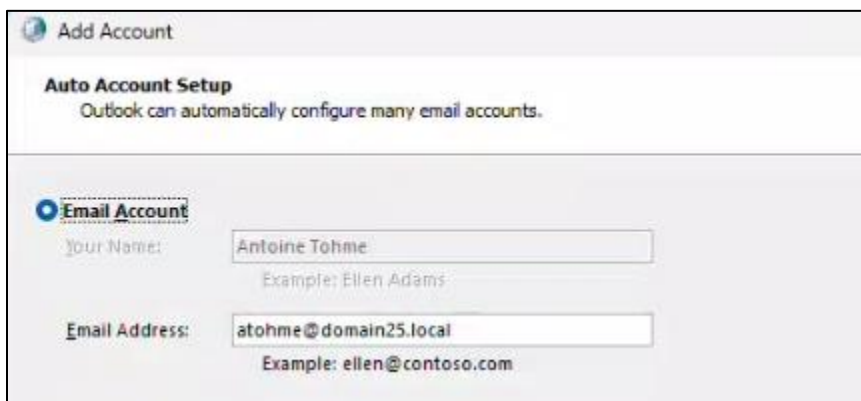

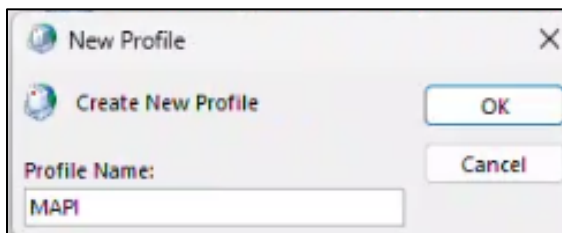

Step 1: Create a MAPI/HTTP email profile

**Open Control Panel** and select **Mail**

Then click on **Show Profiles**

Create a new Profile MAPI

The profile will be created automatically

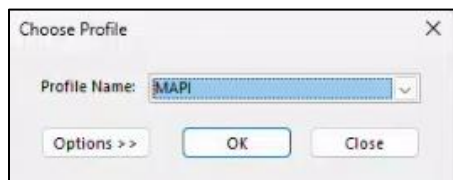

Click on **Finish.**

<mark>Close Edge if it will open.</mark>

_____

Step 2: Test MAPI over HTTP using Outlook (classic) application
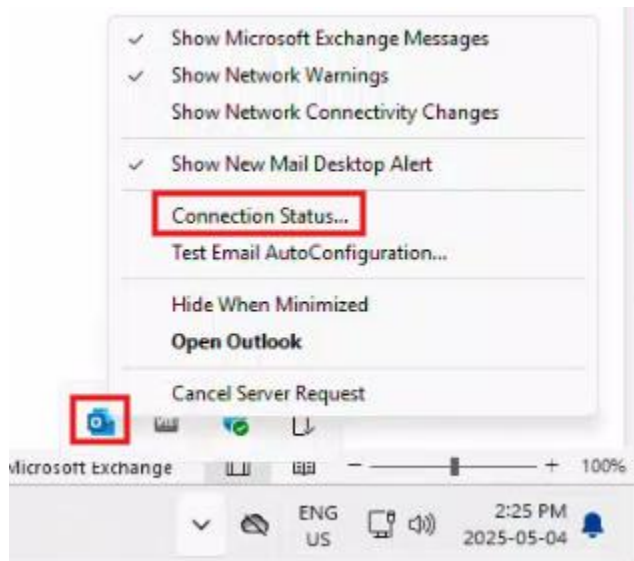

Open <mark>Outlook (classic)</mark>

Select MAPI profile

Verify your mailbox by sending email to yourself.

- To ensure that the **Outlook client** is using **MAPI over HTTP**

- Hold down the **Ctrl** key on your keyboard.

- **Right-click** the **Outlook icon** in the system tray (near the Windows clock).

- Click on **"Connection Status".**

What to look for:

- A window will open with several columns.

- Look for the column labeled **Protocol.**

- If the connection is using MAPI/HTTP, you will see **HTTP** in that column.
